

## Company Description

The adaptation to new market conditions has encouraged many Croatian companies to develop their own treasury and financial departments, i.e. departments responsible for financial assets, liquidity and risks management. Since the need to associate these departments on professional basis existed for some time, a group of Croatian companies' representatives was formed, which subsequently incorporated the Croatian Association of Corporate Treasurers.

As representatives of the treasury profession, the Association will enable us to promote the rules of this profession, to offer the necessary professional development, to exchange knowledge and experience and to open discussions on professional issues as well as on new economy trends.

With the aim of perfecting the treasury profession in Croatian companies and of promoting the overall economic development, we invite you to join us as members, associates and friends of our Association.
